Notes:

On site 14:45; off site 15:45. Partly cloudy, 82 degrees, wind NW approximately 10 mph. Workover rig sprayed oil and gas. Mostly contained on site. Oat field to the SW was impacted. Estimate area to be about 100 meters square. Very little medium reached the ground; nearly completely captured by vegetation (mostly oats but some kochia). Recommended cutting, bagging, and disposing of impacted oats. Landowners will be contacted.

Notes:

Arrived on site at 11:30 a.m. Sunny, 75 degrees F, wind 15 mph out of the NW. Inspected the field north of the pad. Field had been planted, and I could see no visible residue of oil or stress of plants due to spray off site. No additional followup required.
